

The *Discovery Garden*

is located at the UF/IFAS Extension Office, 625 N. Hathaway Ave., Bronson, FL.

The gardens are a living demonstration of principles for gardening in North Florida. It is a great way to see how the turf grasses, shrubs, trees, plants and more grow in our local environment.

The Nature Coast Master Gardeners designed and maintain these gardens.

There are identification plaques throughout the gardens with information on soil, watering, hardiness, sunlight, etc. If you have a smart phone you can use the QR codes to learn more about the turf grasses, shrubs, trees, plants and more.

Inside the extension office there are gardening brochures and informational handouts. If you have any gardening questions, feel free to call Barbara Edmonds at 352-486-5131.
